

SIT will attend the Chillventa trade fair for the first time from October 8th to 10th in collaboration with Panasonic Industry. On display will be the whisperTECH450 fan for residential heat pumps.

Chillventa is the leading event in Europe for the heat pump sector, as well as for HVAC, refrigeration, ventilation solutions and air conditioning for commercial and industrial applications. It takes place every two years in Nuremberg, Germany. SIT will be hosted at the Panasonic Industry booth.

Padua, October 4th, 2024 – SIT will be attending [Chillventa](#) for the first time from **October 8th to 10th** in Nuremberg. The publicly traded multinational will participate in the leading event for the heat pump sector **alongside Panasonic Industry**, being hosted at the Panasonic booth for the occasion. At Chillventa, SIT will showcase the [whisperTECH450](#) fan for residential heat pumps, developed in synergy with Panasonic Industry and previewed a few months ago at the [MCE trade fair](#). The new application will be available in various configurations to meet the specific needs of each heat pump manufacturer, ensuring optimal performance, minimal noise, and compatibility with all refrigerants, including R290. The distribution of the integrated motor-fan system will be managed by SIT and will be available starting from early 2025.

In the days leading up to the event, the SIT Heating & Ventilation division team, along with CEO Federico de' Stefani, will be hosted by Panasonic Industry at the company's European headquarters in Ottobrunn, Germany.

Walter Albè, Head of the Heating & Ventilation Business Unit at SIT, states: “Our participation in Chillventa is important because it places us physically in the top of mind of heat pump manufacturers attending the event, and it provides the opportunity to meet with both existing and potential clients. Just one year after the presentation of whisperTECH450 at MCE in Milan, we are meeting industry operators at another international event with a product dedicated to the residential HVAC market, the result of a strong and effective collaboration. The message we want to convey is that SIT has entered this market with a product ready to go into production starting in 2025, and we aim to contribute by supporting customers through the transition the HVAC sector is facing. Chillventa also gives us the opportunity to further strengthen our relationship with our partner Panasonic Industry, especially in light of possible future product developments.”

In brief: SIT will be attending Chillventa 2024 (October 8-10) in Nuremberg, at the Panasonic Industry booth located in Hall 4 / Stand Number 4-362.

SIT, through its Heating & Ventilation, Smart Gas Metering, and Water Metering Business Units, creates intelligent solutions for environmental condition control and consumption measurement for a more sustainable world. A multinational leader in its reference markets and listed on the Euronext Milan segment, SIT aims to be the leading sustainable partner for energy and climate control solutions, serving client companies with a strong focus on the experimentation and use of low-environmental-impact alternative gases. The group

operates production sites in Italy, Mexico, Romania, China, Tunisia, and Portugal, and has a commercial structure that covers all relevant global markets. SIT adheres to the United Nations Global Compact and its related principles, promoting a responsible way of doing business. SIT is also a member of the European Heating Industry and the European Clean Hydrogen Alliance, as well as the Community Valore Acqua per l'Italia - www.sitcorporate.it
